Election/Restrictions

1. Applicant's election without traverse of Group II, claims 25-61, in Paper No. 5 is acknowledged.

2. Further restriction is required as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention: 1st species including forming interlayer insulating film over thin film transistor, forming anode electrically connected to the thin film transistor through wiring line, forming a resin insulating film over the anode and wiring line, and wiping the anode, and 2nd species including forming interlayer insulating film over thin film transistor, forming an electrode over the interlayer insulating film, forming wiring line connecting the electrode with the thin film transistor, forming a resin insulating film over electrode, wiring line and interlayer insulating film, and forming film a protecting the substrate from electrostatic discharge damage and contamination.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suk-San Foong whose telephone number is 703-305-0383. The examiner can normally be reached on Monday to Friday.
